 Pearson Tutor Services

In addition to the excellent support features for students in Pearson Algebra 1, Geometry, and Algebra 2 Common Core Edition, students also have the opportunity to receive free tutoring through Pearson Tutor Services.

**What is Pearson Tutor Services?**

Pearson Tutor Services delivers one-on-one online tutoring to students. Tutor Services can also be used for immediate help with assignments and projects. It provides scheduled and instant tutoring, homework help, and quiz review all in one place. Think of it as a way to extend the school day: the tutors take over where the teacher has left off. This flexible service provides convenient, expert assistance to the student when the student needs it.

**Pearson Tutor Services Tutors**

All tutors are degreed professionals who can offer immediate one-on-one assistance seven days a week during the evening hours. Tutors undergo weeks of intensive training and must pass stringent certification exams. They adhere to national and state academic standards and curricula. Pearson Tutor Services tutors use their extensive library of online content, question banks, animations, and simulations for maximum student engagement and learning.

**Pearson Tutor Services Sessions**

Students log into their Pearson Tutor Services account and are automatically assigned an online tutor. The tutor uses an online “whiteboard” to draw out the solution. The duration of a typical session is forty-five minutes.
Sessions Are Recorded

All sessions are recorded, and students can play back the sessions as often as needed for review after the session is over. Teachers or parents can also use this playback feature to confirm tutoring has taken place.

Personalized Instruction

Tutoring sessions are one on one, and each tutor teaches one student at a time. This ensures that every student receives 100% of the tutor’s attention. Students proceed at their own pace, and tutors can even create a personalized learning plan based on the student’s needs.

Review

Pearson Tutor Services is a great avenue for students to catch up on missing skills, review for a test, or go over missed questions from homework assignments or exams.
