

Single Sign-On

FAQ

Common questions about the upcoming MPT/Realize Integration

What is Single Sign-On?

Single sign-on (**SSO**) is an authentication process that allows users to access multiple applications with one set of login credentials.

When will SSO be in place?

The Single Sign-on integration with *myPearson Training* (MPT) is expected to be released in **April 2020**.

What will change after this integration is complete?

Once you login to the Realize, EasyBridge, SuccessMaker, or SuccessNet platforms, you will be able to access MPT without a secondary login.

Can I access my platform from MPT?

No. This authentication is **one-way**; you can access MPT from Realize and other platforms, but won't be able to access them directly from MPT.

How will this affect me?

You will now be able to access MPT through the menus in your Realize platform, so you can get training and tips when you need it most.

How will I access my programs after SSO?

You will still access your curriculum programs the same way; through your Realize, EasyBridge, SuccessMaker, or SuccessNet platform.

How will I access *myPearson Training* after SSO?

You can access the MPT Home page through the **Help** and/or **Support** links found in your platform.

How will I access MPT as an LS employee?

You can still access MPT using your **411/myCloud** employee username and password.

What if I already have a *myPearson Training* account?

You can still login directly to MPT using your existing credentials, but we recommend **accessing it through your platform** as a best practice.

What happens to my existing MPT transcript?

The transcripts found on your existing MPT account will be merged with transcripts from your new account, which is created the first time you access MPT from your platform.

What if I have more questions?

If you have more questions, please email the *myPearson Training* team at mypersontraining@pearson.com.
